

# Help... Nature

Babies and children need proper food, rarely ever medicine. If they do not thrive on their food something is wrong. They need a little help to get their digestive machinery working properly.

**SCOTT'S EMULSION OF COD LIVER OIL**  
WITH HYPOPHOSPHITES OF LIME & SODA

will generally correct this difficulty.

If you will put from one-fourth to half a teaspoonful in baby's bottle three or four times a day you will soon see a marked improvement. For larger children, from half to a teaspoonful, according to age, dissolved in their milk, if you so desire, will very soon show its great nourishing power. If the mother's milk does not nourish the baby, she needs the emulsion. It will show an effect at once both upon mother and child.

See and get it at all druggists.

**Important Announcement for Moberly**  
On the 25th and 26th of this month the Missouri State Board of Women's and Young Women's Christian Associations will hold their annual meeting at Moberly, to which every woman in the state is earnestly invited.

These meetings are always fringed with great good to the work of Christianity and these noble women of Missouri who are standing up for the church and for society are priceless jewels in the bee-hive of the state's religious laborers.

Mrs. Daniel Kuhn, of St. Louis, writes the INTELLIGENCER editor asking him to extend a cordial invitation to the ladies of Lexington to go to Moberly, which we take great pleasure in doing.

**To Be Buried Alive.**  
Carl Atheno, the young man who is to bury himself at Kansas City for six days, said Tuesday that he had made all arrangements to be buried next Monday evening. There is no law to prevent any scientific experiment that a man wishes to subject himself to, but he visited the officers at the city hall to make sure that no objection would be made.

Atheno says his condition will be cataleptic while he is under ground. There will be a tube running into the coffin with three thicknesses of glass and an electric light just above his head. With this exception he will be buried under six feet of earth exactly as if he were dead. The coffin is larger than is ordinarily used, large enough to allow him 144 cubic feet of air. He says he breathes so little that a cubic foot of air will last him an hour while he is in the cataleptic state, but should he wake up during the experiment it would be necessary for those above to break the glass in order to give him air. The heart and lungs do not suspend action entirely, but their action runs very low, he says.

**Stiff Prices for Beet Cattle.**  
In the sale of fifteen Shorthorn steers at the Chicago stock yards, on Wednesday, the highest price of the year was realized. The sale was made at \$7.10, the average weight being 1,572 pounds, making the value of the steers more than \$111 each. Two cars of cattle were also sold during the day at \$6.81, both sales being made on their merits. The cattle were shipped by George C. Mowry, of Geneseo, Ill., and are said to have been bought for exhibition at the Pittsburg Fat Stock show.

Everybody who went to the New Grand opera house Monday night realized the fact that "Brown's in Town." The play was well staged and every character portrayed in a manner complimentary to the delineator. It was an evening of fun and any audience, in any opera house, may depend upon an evening of unalloyed pleasure when "Brown's in Town." Manager Waddell is to be congratulated on bringing such plays to Lexington.

Oscar Andreen, who represents the St. Louis Paper company, went over to Richmond Friday morning to attend the funeral of the late Geo. W. Trigg, which took place from the Methodist church, that city, during the afternoon.
